FIG. 16 shows a "List Procedures" node 243. When a field (attribute) is
selected by the user on a form, if it has a list, the form.sub.-- mgt
will cause it to be displayed. Lists are associated with the attribute.
Some attributes have fixed lists, which are handled by form.sub.-- mgt.
Other attributes have **dynamic** **lists** that change based on the
value of other attributes previously entered. List procedures are
responsible for creating those **dynamic** **lists**.
